THC Metabolite	Negative	1.00 pg/mg	0.10 pg/mg

\*picograms per milligram of hair

**HAIR DRUG TEST RESULTS****Qty Found****Negative****REPORT NOTATIONS**

**HairConfirm test results are anonymous and for personal use only. HairConfirm test results cannot be used in court or legal proceedings.**

\*\*In some cases, HairConfirm may be unable to detect THC despite the donor's known marijuana use. A number of factors will determine whether or not THC will bind with the hair shaft (i.e. type/purity of marijuana used/person's metabolism). If THC does not bind, and therefore does not appear in a hair follicle exam, a negative result for marijuana will be indicated.
